MEMORANDUM FOR THE CHIEF OF STAFF

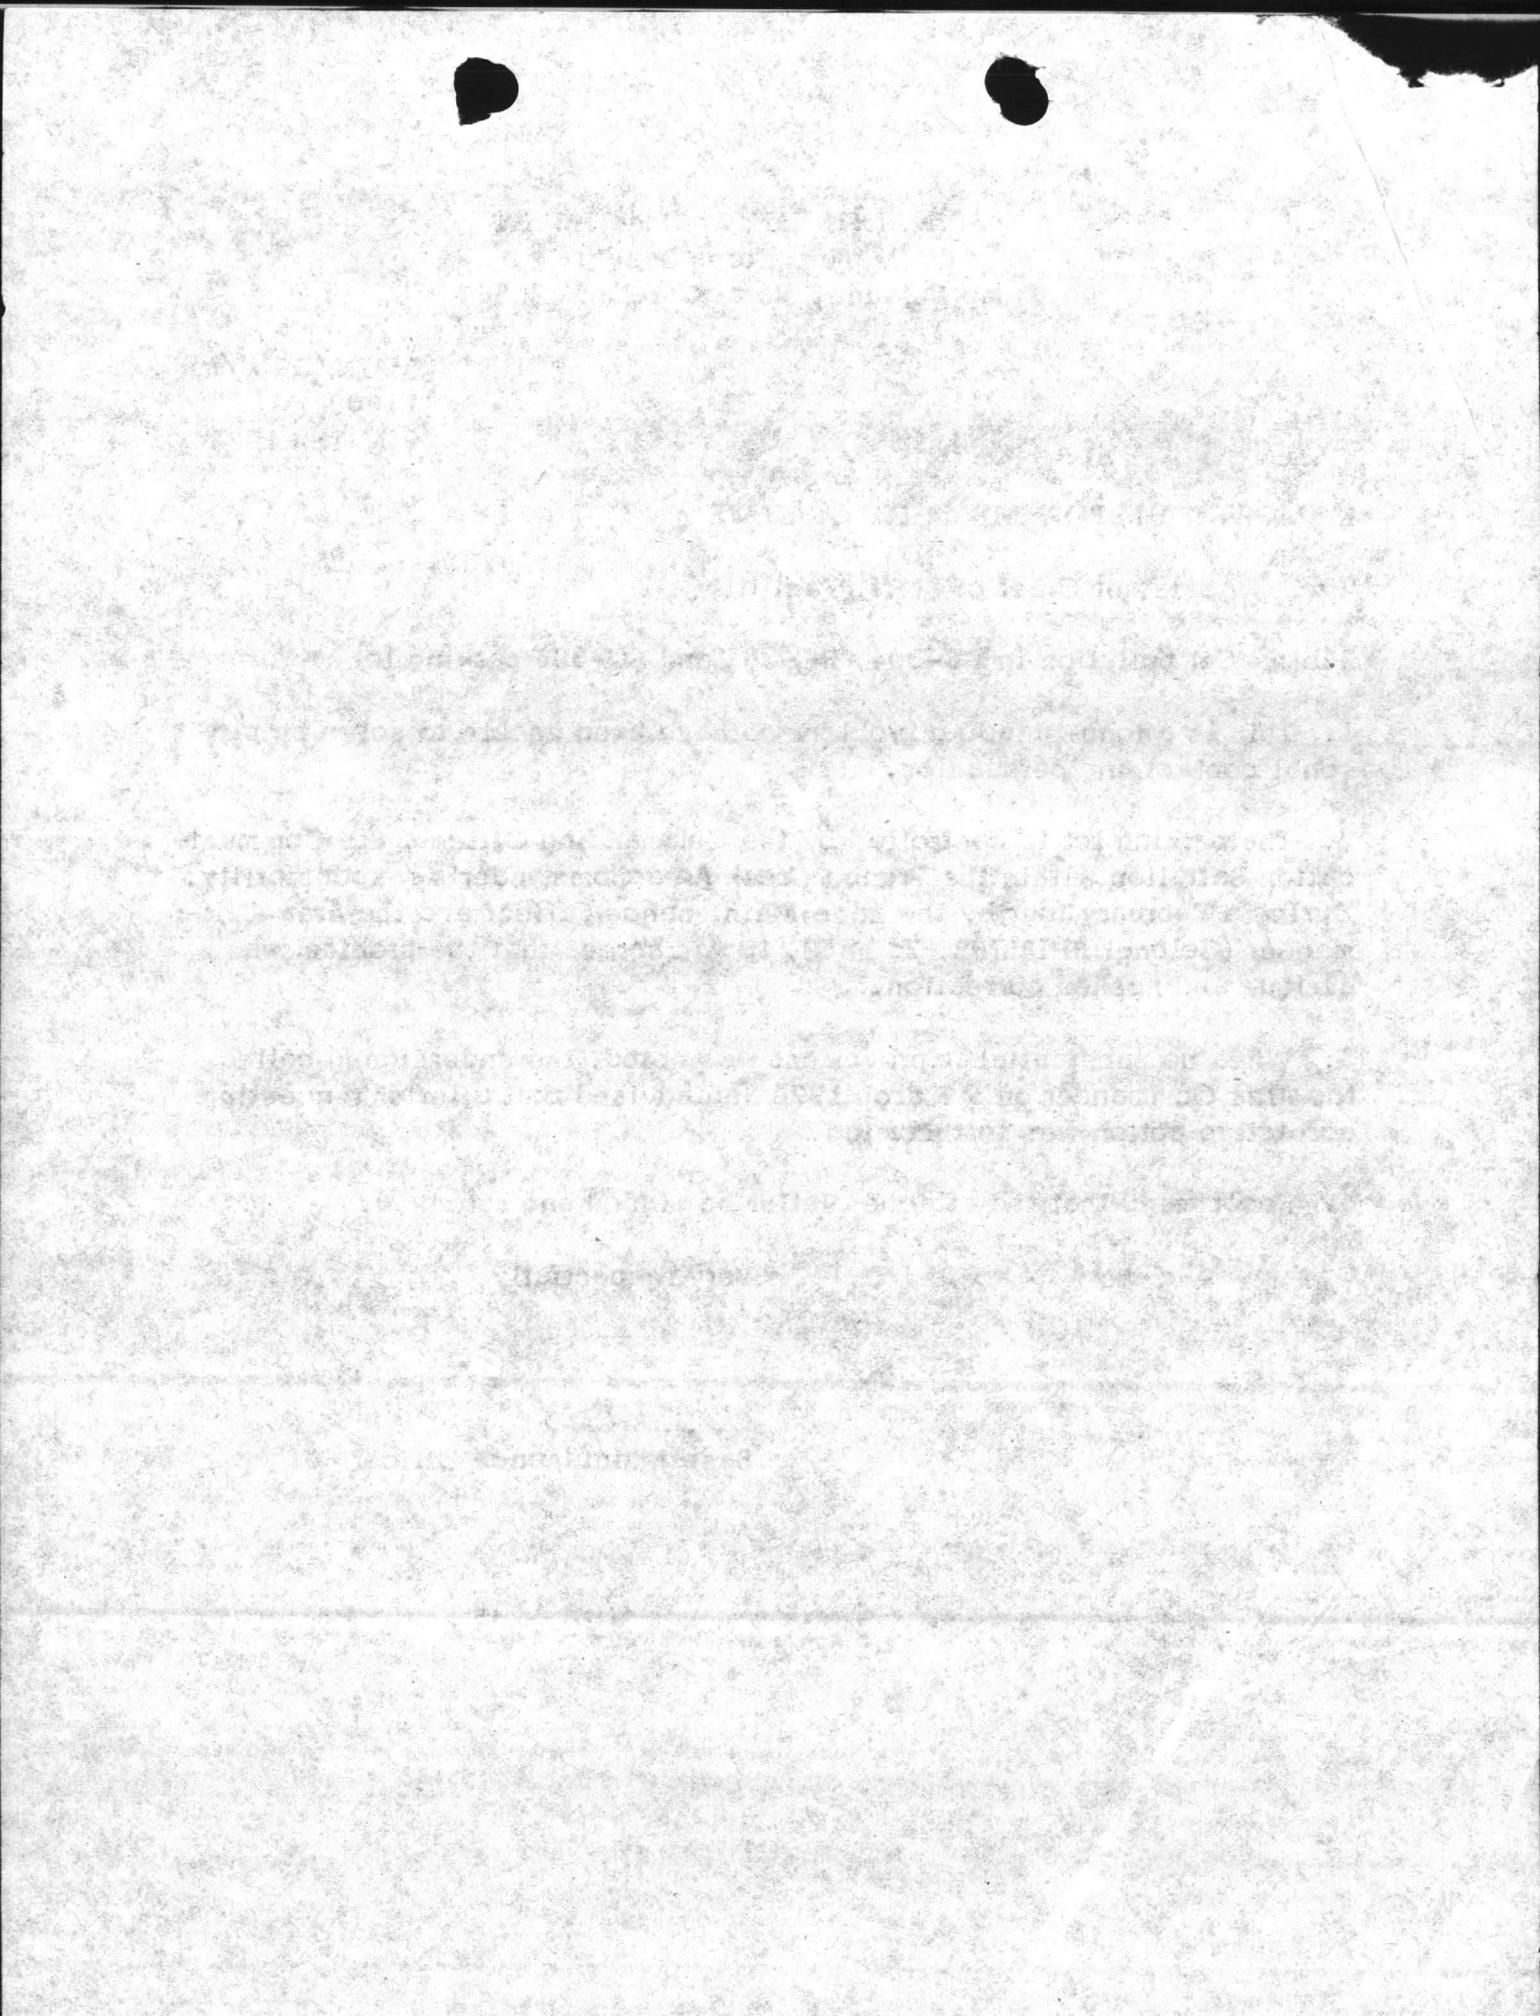

Via: Assistant Chief of Staff, Facilities

Subj: Oil pollution in FC-304, FC-305 and FC-306 parking lot

1. This is a long-standing problem we have been unable to solve by personal contact and persuasion.
2. The parking lot is controlled by the Commanding Officer, 8th Communication Battalion within the French Creek Area Commander's responsibility. During a February tour by the Base Maintenance Officer and the Area Commander (Colonel PHILLIPS, 2d FAG), it was agreed that the problem was serious and needed correction.
3. When no substantial improvement was noted, the undersigned called the Area Commander on 5 March 1976 and advised that a letter requesting corrective action was forthcoming.
4. Recommend that the attached letter be signed and released.

Very respectfully,

C. D. WOOD  
Base Maintenance Officer

From: Commanding General  
To: Commanding General, Force Troops/2d Force Service Support Group,  
FMFLANT

Subj: Oil pollution in the FC-304, FC-305 and FC-306 parking lot

Ref: (a) MCO P11000.6A  
(b) EO 11090.1A

1. Natural Resources and Environmental Affairs Division personnel conducting routine pollution abatement surveys documented on two occasions in 1975 that storm drains, located in the parking lot east of buildings FC-304, FC-305 and FC-306, were being used for disposal of waste oil from privately owned vehicles. Oil flows from this point through the drainage system and contaminates New River.

2. Two additional instances were documented in January and March of this year, and it was also noted that the area did not reflect a proper state of police due to an accumulation of litter adjacent to the parking lot.

3. In addition to violating federal, state and base environmental standards, a continuance of this problem poses a threat to community relations because of the recreational and commercial fishing activity in New River and its tributaries.

4. It is requested that corrective actions be initiated toward achieving compliance with references (a) and (b).

G. C. FOX
